

Eurometaux

We represent the non-ferrous metals producers and recyclers Our mission - a thriving metals industry supplying Europe's climate transition

Who are we?

An umbrella association representing non-ferrous metals producers and recyclers in Europe

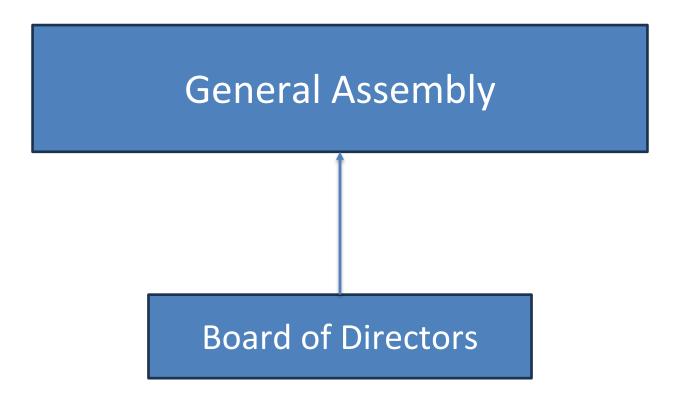

A collective advocacy network for Europe's non-ferrous metals value chain

A supporter of thousands of STEM jobs and a catalyst for retaining talent in Europe

Eurometaux Organisational Structure

Energy Climate Change Committee

Chemicals
Management Steering
Committee

Sustainability Committee

Trade & Resp. Supply Chain Committee

Advocacy Committee

What we offer

- Build partnerships & alliances with stakeholders to develop joint advocacy and shared positions
- Connect with industry leaders and policymakers to defend EM's positions

To:

Ms. Ursula von der Leyen, President of the European Commission
Mr. Maroš Šefčovič, Commissioner for Trade and Economic Security

Dear President von der Leyen and Commissioner Šefčovič,

Eurometaux, the European Non-Ferrous Metals (NFMs) association, calls on the European Commission to find a mutually beneficial agreement with the US that will remove all unnecessary trade barriers between the two blocs and avoid the imposition of additional retaliatory measures - ahead of the upcoming deadline of the reciprocal tariffs pause extended to August 1st.

The EU and the US have the world's largest bilateral trade relationship, built on free, fair and rules-based trade. Particularly, the EU-US NFMs supply chains are very much interconnected, and any trade barriers will negatively disrupt the EU metal industry. The EU NFMs industry is critical for Europe's green and digital transition, as well as for its defence ambition, since these policy goals all require higher volumes of metals and minerals.

The imposition of the US so-called "reciprocal tariffs" and the increase of the Section 232 tariff on US steel and aluminium imports to 50% affect both directly and indirectly the EU market and put at risk different segments of the EU NFM supply chain. Additionally, the EU rebalancing measures, as currently drafted, will inflict irreparable

damage to crucial value chains of the NFM industry.

- Monitor EU policies and provide policy analysis
- Represent industry and provide input in expert groups, committees, and platforms
- Strategic intelligence through newsletters, briefings, and tailored updates.

What we offer

- Gather data and draft reports to inform decisionmakers
- Attend expert panels & closed-door events and roundtables
- Create opportunities for industry- shaping discussions

What we offer

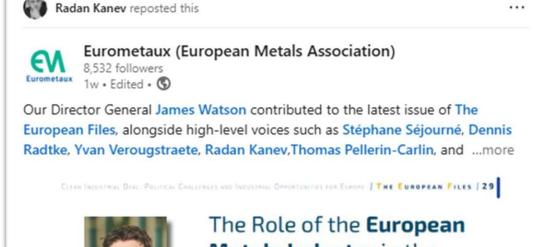

- Raise awareness on key issues through social media, press, media networks, and targeted communication campaigns
- Promote members' visibility and reputation through dedicated initiatives and outreach activities

Eurometaux had the chance to witness a great moment for the metals sector in Europe this week - the inauguration of the Rävliden expansion of the Kristineberg mine operated by Boliden with support from Swedish Energy Agency, ABB ...more

Metals Industry in the Clean Industrial Deal: **Reconciling Mineral** Sovereignty and the **Ecological Transition**

metals. This is not a fancy statement of intent, it is an estimation of the most ikely outcome of the twin transitions that we and energy. The past and the present belong to the era of fossil fuels: our economies, our societies, and our daily lives depend on access to fossil fuels to allow us to work, sleep, eat and have fun! This is changing, faster than most people realise. Renewable energy, high speed internet, artificial intelligence and

we have a robust non-ferrous metals sector in Europe. However, every year smelters of are currently going through - in digitalisation is a catastrophe and the opposite of what is mission identified this and in 2023 brought forward the Critical Raw Materials Act (CRMA) Eurometaux are included as CRMs in the CRMA.

> This is good news as it means that we in Europe understand that we need to develop our production and processing of the metals we need for our clean and digital future here n Europe. The CRMA sets targets that imply we would need at least 10 new mines, 15 new melters and 15 new recycling plants in Europe by 2030 according to Eurometaux, otherwise we will miss this objective (and all the negative plications that has for our dependency So, here is the rub - we are losing capacity in netal production at exactly the time it should

Energy Intensive Industries (Ells), but this alone does not go far enough. The answe the Clean Industrial Deal State Aid Cuidelines plants ability to respond to price signals. Al run producers. Once the process is started in through a hoop that does not take account of

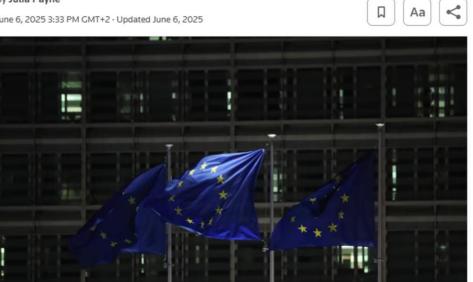

aluminium, copper and nickel. Missing many

Metal industry group says new EU state aid rules fail to help

EU - Commission seeks advisors for its sustainable finance taxonomy - The Commission is looking for up to 28 members to serve under the third mandate of an advisory platform on sustainable finance, according to a 9 July call for applications. Recruits will examine plans to make technical screening criteria under the taxonomy simpler and more usable. Certain recommendations will focus on prioritised sectors such as real estate and transport, the call said. The EU's taxonomy rules classify economic activities by environmental performance, offering a framework for corporate reporting and sustainable finance — but debates over how to treat natural gas and nuclear power in particular have proven controversial. Existing members of the platform include representatives of lobby groups Eurometaux, the European Banking Federation and the European Chemicals Industry Council. The call is open until 7 September, for a mandate running from early 2026 to end-2027.

Effective engagement

To ensure a competitive future for Europe's Metals Sector

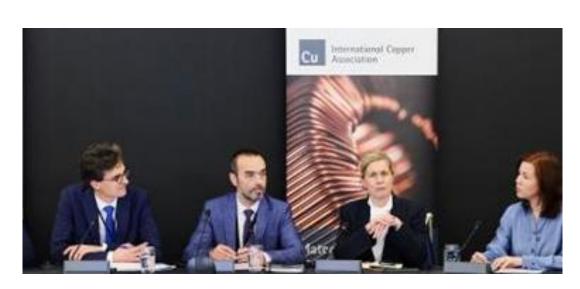

Direct Engagement with EU Decision-Makers

- Regular meetings with MEPs, Commissioners, and other policymakers to influence key policies
- Active participation in EU legislative discussions
- Policy briefings and technical expertise provided to decision-makers to ensure well-informed legislation

Building Strategic Connections for Our Members

- Exclusive industry events, such as Metals Day in Strasbourg, where members engage directly with EU officials
- High-level policy roundtables, networking opportunities, and advocacy campaigns
- A platform for members to connect and strengthen relationships with key policymakers and industry leaders

Eurometaux is a member of

Full Members (FM):

Category I Full Membership (€65,000 per year)

Companies or undertakings having a direct link with the non-ferrous metals sector in Europe and meeting the following conditions:

- Supporting the objectives and activities of the Association.
- Actively working in mining, processing, refining, smelting, recycling, metallurgical production, ingot making, or processing of metals and certain mineral substances.

<u>Category II Full Membership</u> (Annual fee: €100,000, €50,000 or €25,000 / Specific criteria will be defined in the Internal Regulations)

National associations representing the non-ferrous mining and metals industries.
 (mining, metallurgical production, recycling, ingot making, processing of metals and certain mineral substances, foundries) which support the objectives and activities of the Association.

Category III Full Membership (€140,000 per year)

• European and International Commodity Federations/or Associations and Associations which represent the non-ferrous metals industry or part thereof and which support the objectives and activities of the Association.

Membership overview

Association Members

- Companies and associations engaged directly in the non-ferrous metals sector in Europe
- Associations, companies and federations which do not fulfil the conditions to become a Full Member, but which are in other ways participants in the non-ferrous metals sector in Europe (€30,000/year / extra committee: €25,000)
- Downstream users, end users, traders working in the non-ferrous metals industry with a presence in Europe (€22,500/year / extra committee: €25,000)
- Start-up companies in or related to the non-ferrous metals sector with less than 50 employees and a turnover under 50 million EUR per annum based in Europe (€10,000/year /extra committee: €25,000; status reviewed after 2 years)
